

# BC-Wedge™

**Easily Input Data from Any (Decoded) RS232 Bar Code Scanner Directly into Any Windows or DOS Application**

## **BC-Wedge:**

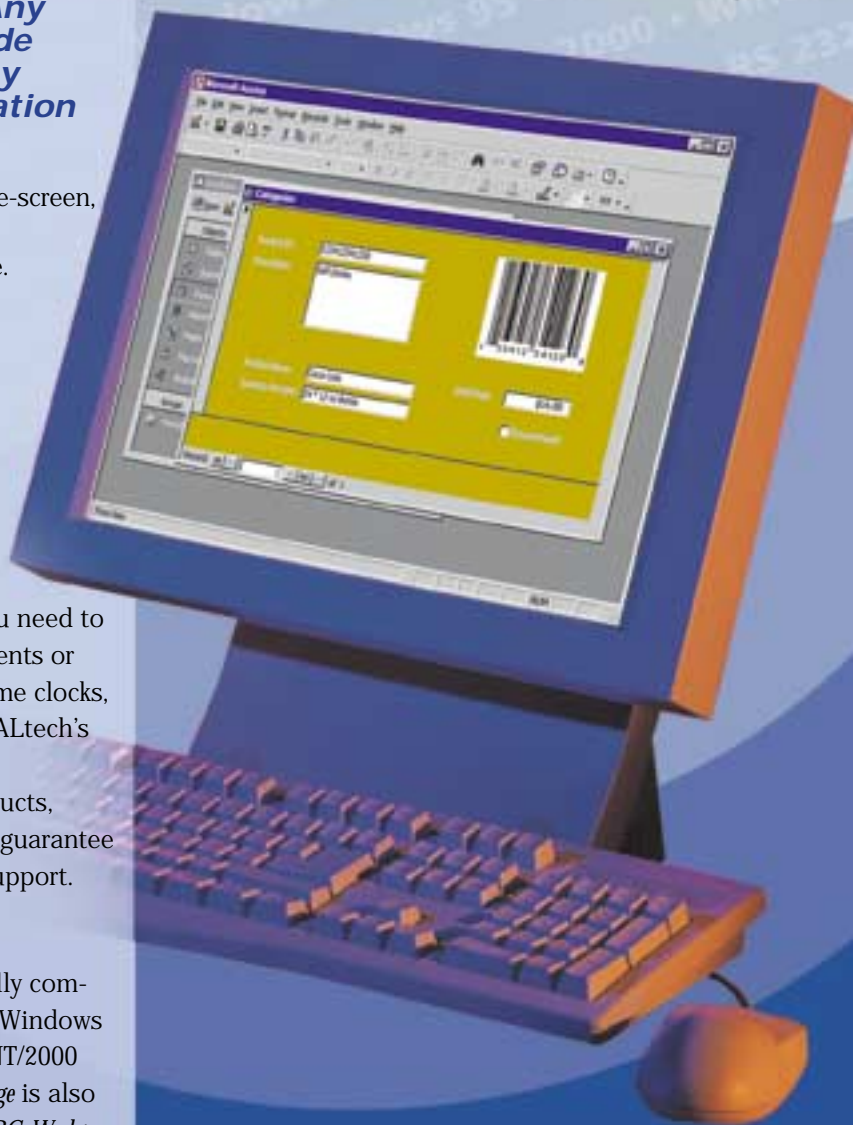

- Is extremely easy to use, with a one-screen, one-minute setup.
- Is 100% accurate and 100% reliable.
- Supports all versions of Windows and DOS.
- Supports COM 1 to COM 4.
- Adds keystrokes, as required, to automate data entry.
- Is fully compatible with any PC or laptop.

*BC-Wedge* is designed to work with BAR CODE SCANNERS ONLY. If you need to collect data from any other instruments or devices, including RF equipment, time clocks, scales, gages or PDTs, you'll need TALtech's *WinWedge* products.

As with all TALtech software products, *BC-Wedge* has a 90-day money-back guarantee plus free and unlimited technical support.

## **Compatibility Requirements**

The 32-bit version of *BC-Wedge* is fully compatible with any PC running any 32 Windows operating system (Windows 95/98/NT/2000 ME/XP). A 16-bit version of *BC-Wedge* is also available for Windows 3.1 or DOS. *BC-Wedge* uses minimal system resources.
