

Bar Code DLLs

Professional Quality Bar Code Programmer Tools

The TALtech Bar Code DLLs are designed for professional programmers who are developing applications that require a much lower level of control over the production of bar codes. The DLLs can also be used with Windows development languages that do not support ActiveX controls.

The DLLs produce the same high quality bar codes as our Bar Code ActiveX Control and create all bar code images as high-resolution Windows metafile graphics that will print perfectly on any printer.

One simple function call is all it takes to generate a perfect bar code graphic image.

The DLLs can:

- Render your bar codes directly to a printer or screen.
- Return your bar code images to a memory-based metafile or a metafile stored in the clipboard.
- Save the bar code directly to disk as a Windows metafile.

“Once you install the package, you’re ready to go. You can use snippets from the sample code directly within your application and distribute your app royalty free. I printed barcodes on a 600 DPI laser and they look fantastic...TALtech has the market on this one.”

– VB PROGRAMMER’S JOURNAL

Sample Source Code Included

In addition to a clearly written users manual, several source code sample projects written in Visual Basic, C++ and Visual Basic.NET are provided with the DLLs to demonstrate how to use them. A complete bar code tutorial is also provided.

Royalty-Free Distribution license.

The TALtech Bar Code DLLs come with a royalty free distribution license.

Benefits of TALtech's Bar Code Software

- Creation of high quality bar codes as graphics that will print perfectly on any printer.
- Easy automation of bar code production in Word, Access, VB and other Windows applications.
- Support for all the major bar code symbologies, Code 39, Code 128, UCC/EAN 128, UPC-A, UPC-E, EAN-8, EAN-13, Bookland, Interleaved 2 of 5 (ITF), MSI Plessey, Codabar, PostNET and more. B-Coder Pro, the DLLs and the Bar Code ActiveX PLUS also support 2-D symbologies PDF 417, Aztec, Data Matrix, RSS14 and more.
- Complete and accurate control over all bar code dimensions, including narrow bar width, bar height, narrow-to-wide ratios, bar width reduction and magnification factors.
- Bearer bars, supplemental messages, quiet zones, check digits, start and stop codes, bar code rotation and color selection.
- Full font selection for human readable text and additional comment lines above or below your bar codes.
- Free and unlimited lifetime technical support by phone, email and fax.

B-Coder and the ActiveX PLUS version create bar codes in most graphic file formats including WMF, EPS, TIF, GIF, JPG, PNG, BMP and more.
